Forecast for Tuesday 05 Nov 2024

Weather: High pressure dominating. Cloudy but mostly dry in the morning. Cloud thickens and lowers through the middle of the day with some outbreaks of light rain or drizzle. Becoming drier again through the late afternoon, but remaining quite cloudy.

Chance of cloud-free hill tops above 700m: 40% at first, falling to little chance through midday, rising to 60% by evening.

Low cloud and visibility: Areas of cloud down to 400-600m through the morning. This becomes more extensive and lowers through the middle of the day with visibilities falling widely poor. Cloud generally lifts and breaks through the late afternoon, but leaving some broken areas of cloud around 400-600m.
